Product Overview

The Maquet Alphamaxx has unprecedented flexibility when it comes to patient positioning. The head and leg sections are totally interchangeable, not to mention the wide variety of additional table sections that are available to optimize patient positioning.

Among the many attachments are a carbon fiber extension that provides unimpaired visibility when using a C-arm. The leg section can also be replaced with traction bars making the table a good choice for trauma centers.

The strong column and wide footprint allow the patient to be positioned in normal and reversed orientation without compromising stability. Combine this with the flexibility and connectivity of the patient platform and this table provides the ability to position any patient optimally for surgery without compromising patient comfort.

Perhaps one of the most impressive features of this table is its ability to support and position patients weighing as much as 990 lbs. The stable footprint of this table permits the most extreme positions to be accomplished without compromising stability.

Equally impressive are some of the engineering features built into the table:

- Fully rechargeable battery that will last 4-5 days on a single charge (or approx. 50 operations).
- High impact, scratch resistant base which is both functional yet cosmetically pleasing.
- Multi-piece, 6-section patient surface that is extremely easy to reconfigure for different procedures.

Lastly, the Alphamaxx provides the ability to transport the table (complete with patient when lowered and leveled) using the Auto Drive feature. The drive system requires no pushing or pulling by the care giver to move the table and patient, thereby reducing the risk of back strain.

Maquet Alphamaxx General Surgery Table

Specifications:

| | | |
|-------------------------------------|---------------|--------------------------------|
| Table Height | | |
| Raised..... | 41 1/2 inches | Leg Section (Removable) |
| Lowered..... | 23 3/8 inches | Down.....90° |
| | | Up.....10° |
| Trendelenberg: | 30° | Table Top Slide |
| Reverse Trendelenberg: | 30° | 9 inches |
| Head Section | | Return to Level |
| Raise..... | 0-45° | '0' Button |
| Lower..... | 0-45° | Auto Drive |
| | | Hand Control |
| Lateral Tilt: | ±20° | Brakes (Electronic) |
| | | Hand Control |
| Back Section | | Weight Limit |
| Down..... | 40° | 990 lbs |
| Up..... | 80° | Width: |
| | | 20 15/16 inches |
| Seat Section | | Width w/Rail |
| Flex..... | 40° | 22 3/4 inches |
| Reflex..... | 85° | |
